Forest Practitioners**

Storm Damage Cleanup Training
For Fire/EMS &
Homeowner

This class encompasses the damage caused by ice, wind, hurricanes, tornados, snow, micro bursts, and Noreasters. With the severe weather we have been experiencing all throughout the United States, this training is invaluable when damage strikes, and lives are at stake.

This program covers aspects of safety clothing and the dynamics of its usage, an understanding of a power saw and matching the unit to the operator. We will cover the safety features of the chainsaw. The how and why the machines are engineered to operate the way that they do. After learning what equipment is needed for the task of storm damage clean up, we will show how to help evaluate the trees and the damage, and how to safely remove them. This class will consist of three hours classroom, and 2 hours outside.

Private group instruction can be scheduled for your company or group of 15 people. Contact Logger Rescue at 860-450-0002
